

# VIS-Check Special \$100

The **VIS-Check** is a diagnostic machine that checks the brakes, steering and suspension of heavy trucks, transit buses, school buses, motor homes and more.

- Automated brake testing
- Foundation brakes are tested to general requirements specified by the DOT and CVSA
- Fast diagnostics find brake, steering and suspension issues in minutes

## VIS-Check quickly detects:

### Brakes

- incorrect brake adjustment
- faulty slack adjusters
- glazed or contaminated linings
- damaged S cam components
- drum out of round conditions
- broken parking brake springs
- unbalanced braking force
- weak braking force

### Steering & Suspension

- worn tie rod ends and king pins
- spring pins, shackles & hangers
- worn bushings
- shock absorbers
- loose U bolts
- air bag integrity

### Frame & Chassis

- weight distribution
- axle load balance
- worn engine mounts
- damaged cab mounts

### Other

- detects high rolling resistance
- finds loose wheel bearings
- drive train problems
